EQUIPMENT BUILT FROM EXPERIENCE

CONTROLS GRUBS, MOLE CRICKETS, CHINCH BUGS AND OTHER TURF PESTS ON TOP OF OR BELOW THE SURFACE

The Kesmac Root and Surface Pest Controller is an effective and innovative way to control turf residing pests.
Punctured surface with pressurized streams ensure coverage to the turf surface down to the root level.
Three sizes are offered to suit your requirements. A 4 foot PTO model for smaller turf areas with tight spaces, and a 8 or 12 foot PTO driven model for larger turf areas.

Features

- Punctures surface to root level while maintaining ability to harvest or use turf immediately
- Spacing adjustment available
- No damage spikes for golf courses
- Pressurized streams penetrate up to 2 ½"
- 300 gallon tank (8 & 12 foot model)
- Available in 4, 8 or 12 foot PTO driven model
- Follows ground contours
- PTO driven diaphragm pump
- Quick hydraulic lift for easy transport
- Operated on a mid-size tractor
- 4 inch and 6 inch teeth spacing for aeration
