

MAGNUM BIG ROLL SOD  
**HARVESTERS**

42BR | 42CP | 420SR | 420SRA | 4200AR

# 42BR

*Need flexibility?  
Magnum machines  
cut rolls in widths of  
30", 32", 36", 40",  
42" and 48"*

## 42BR

Length	13.3 ft.
with slabber trailer	23.3 ft.
Width	7.7 ft.
Cutting width	30 in. 42 in. & 48 in.
	solid heads or twin floating heads
Height	6.5 ft.
Shipping weight	3650 lbs.
with slabber trailer	4850 lbs.
Electrical system	12 volt

*You are in complete control.*

**W**ith its introduction more than 15 years ago, the Magnum 42BR Big Roll Harvester our first harvester model and still our mainstay has earned a reputation for dependability and performance in a variety of conditions, harvesting a variety of turf grasses.

Our patented net application reinforces tender sod and loose soil so you can realize the full benefits of big rolls: by harvesting less mature grasses, you get quicker turn around on your sod. And with the net backing, you can cut thinner to save soil or thicker as the job requires - from 1/4" - 1/2" to 3".

Our innovative two-conveyor system gives you new found control over rolling tension. You'll be able to pull sod into tighter rolls and stop and start a roll without gaps. Just skip over the bad turf patches and pull up on the ends with no problems.

Our unique approach to sod harvesting keeps the roll off the ground. That reduces damage and hand labor.

# 42CP

## 42CP

Length	13.3 ft.
with slabber trailer	23.3 ft.
Width	7.7 ft.
Cutting width	30 in. 42 in. & 48 in.
	solid heads or twin floating heads
Height	6.5 ft.
Shipping weight	3650 lbs.
with slabber trailer	4850 lbs.
Electrical system	12 volt

No other machine can match the way a  
Magnum Harvester cuts big rolls.

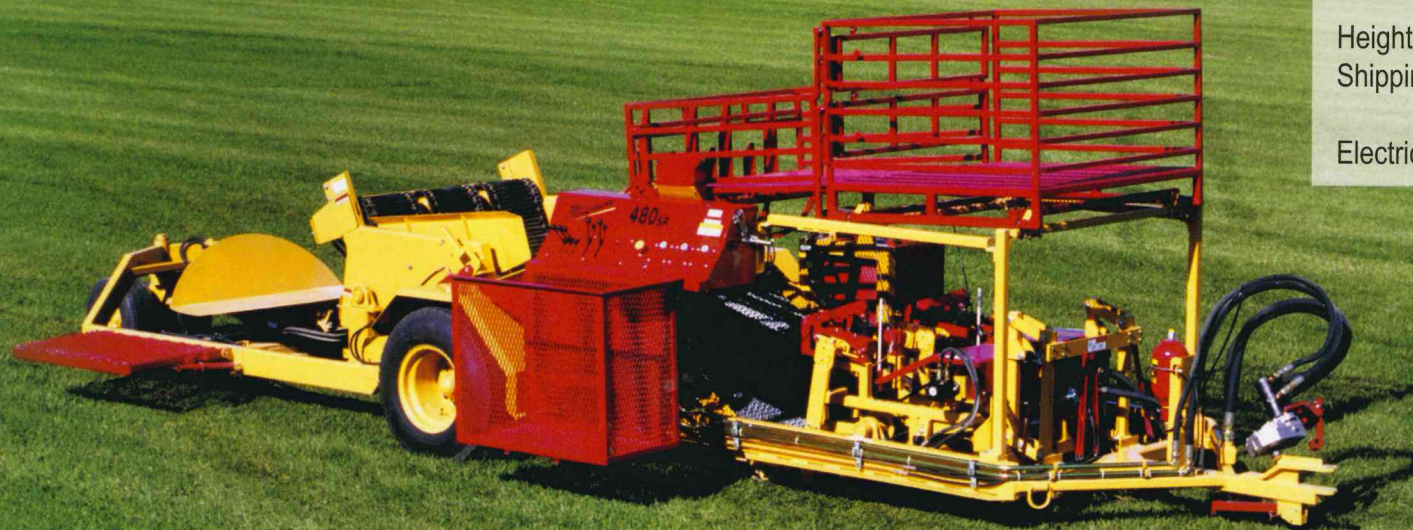

The Magnum 42CP is famous for its versatility. It's like having three harvesters in one. In just 15 minutes, you can convert the Magnum 42CP machine from big rolls to either slabs or small, pallet-sized rolls. This high performance harvester creates two slabs or rolls at a time and places the pieces at working height, saving back-breaking labor. A canopy shields harvest hands from the sun.

*Cut big rolls, slabs or pallet-sized rolls with the Magnum 42CP. It's like having three harvesters in one.*

# 420SR

## 420SR

Length	20 ft.
with tipper	27.5 ft.
with tipper and tractor	39 ft.
Width	8.5 ft.
Cutting width	30 in. 42 in. & 48 in.
	solid heads or twin floating heads
Height	7.8 ft.
Shipping weight	5900 lbs.
with tipper	6500 lbs.
Electrical system	12 volt

*Anti-vibration cutting heads are always in synch and require less maintenance.*

The Magnum 420SR is a semi-automatic big roll harvesting machine. Incorporating all the features of the Magnum 42BR, the 420SR has loads of additional features that help reduce downtime, save lots of labor and speed harvest time.

It's large removable tube rack is easy to reload. A tube injector makes for quick and easy tube addition and with the net injector you can introduce net to the big roll at the start or the end of the roll. A self-starting conveyor eliminates hand wrapping turf around the tube.

# 420SRA

## 420SRA

Length with tractor	39 ft.
Width	8.5 ft.
Cutting width	30 in. 42 in. & 48 in. solid heads or twin floating heads
Height	7.8 ft.
Shipping weight without tractor	6500 lbs.
with John Deere 5425 tractor	13,885 lbs.
Electrical system	12 volt

"Give it the flexibility, footprint and operating characteristics of the Magnum 420SR, but be sure to include the great technology features of the Magnum 4200AR".

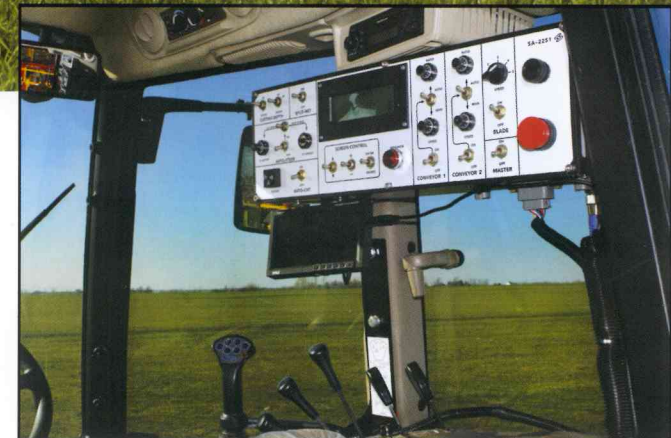

The industry's first **one-man** pull behind Big Roll harvester

The newest model in the Magnum Harvester line – the 420SRA – is ready to harvest your turf... and new profits. Our award-winning Magnum 420SR big roll harvesting machine has a new sister model, the Magnum 420SRA. It has all the standard features of the popular SR and the one-man controllability and automation features of the Magnum 4200AR.

The result is increased harvest speeds with a smaller, easier to maneuver machine, dramatically increased total turf output, more big rolls per hour and more revenue per acre in one great new affordable price range.

As with all Magnum Harvesters, you'll find the new Magnum 420SRA is just "a cut above".

*Eliminate the "operator in the basket" with total control of the harvest from the cab*

# 4200AR

## 4200AR

Length		29.5 ft.
Width	without tractor	8 ft.
	with tractor	16.7 ft.
Cutting width	30 in. 42 in. & 48 in.	
	solid heads or twin floating heads	
Height		7.8 ft.
Shipping weight	without tractor	8000 lbs.
Electrical system		12 volt

All Magnum Harvesters offer you the innovation, flexibility, options and performance you need to please more customers, operate more efficiently and generate more revenue.

*The John Deere model 6415 completes the Magnum 4200AR package.*

The Magnum Harvester 4200AR is the ONE MAN big roll harvester that is bringing the future of sod harvesting to the field today. With one man in a controlled cab tractor environment, you can harvest more sod in less time with less labor than ever before.

You're in complete control with this Magnum machine: increased harvest speeds and decreased downtime between rolls dramatically improve total sod output. Quick turnaround and easy alignment at the end of harvest rows ensures quality harvesting. And a manually controlled back-up system brings added security.

Every feature built into the Magnum 4200AR was designed to help you deliver more big rolls per hour and more revenue for your farm.

# NETTING

Our FIELD Net

**IMPROVES**

Your FIELD's Net.

*Call Bucyrus Equipment – makers of the Magnum line of turf harvesters – for all your netting needs. Immediate shipment from multiple warehouses is available year 'round.*

*We carry a complete range of Big Roll Net sizes – 23", 29", 40" and 46" – and Field Net sizes – 17' and 20' for all brands of turf equipment. Big Roll Net and Field Net can be combined for bulk discounts.*

**Magnum Big Roll Net**

Magnum Big Roll Net and Magnum Field Net can help you increase your net on every acre you harvest. Big Roll Net and Field Net are loaded with the features that provide maximum benefits for profitable turf harvesting.

Big Roll Net delivers improved strength, flush edges and longer heavy-duty lengths – important keys to profitable big roll production.

Field Net's steel cores eliminate bent rolls. Longer rolls mean less changing time and the improved performance that make it the easiest and fastest field net to install.

Best of all, the talented team from Bucyrus Equipment Company – with more than eighty years of turf experience – is ready to give you the support, service and delivery you need to make it all net out profitably for you.
