

SINGLE OPERATOR AUTOMATIC SOD STACKER

'Compact, proven, universal, economically and durable'.

The Turf Tick Universal Stacker™ is the ideal machine for farms up to 75 hectares with a daily capacity of approximately 6000 – 7000 m², seeking durability and consistency in automatic sod harvesting. Expect less downtime and expensive repairs: simplicity results in lower costs.

Our stacking system transfers 1,2 or 3 rolls depending on pallet size and stacking pattern. Easy to maintain, single operator sod harvester built with European quality.

Expect a capacity of 550 m² - 950 m² per hour (depending on pallet size/ roll thickness / roll length and turf).

Our Turf Tick Universal Stacker™ comes with auto steer, including rear wheel steering.

The Universal Stacker™ with automatic pallet injector produces 40cm (16") rolls. The pallet injector holds up to 7 pallets. Fully compatible for the following pallet sizes:

- 120x120 cm
- 120x100 cm
- 120x80 cm (Euro pallet)

Specifications:

- Autosteer
- Coulter discs with reversible cutting blade
- Optional Palletinjector
- Optional front brush

Required tractor:

- 4- wheel driven tractor with a minimum of 75 HP.
- Category II three-point hitch, minimal 1 single acting hydraulic plug-in.

Specifications subject to change without notice or obligation.
Printed in the Netherlands (2015).

Compact design, durable stacking system.

Palletinjector holds up to 7 pallets.

Clean cuts, firm stacked pallets, programmable pallets.

Durability and consistency for higher efficiency.
